[2030 Agenda for Sustainable Development](#)

The agenda is a plan of action for people, planet and prosperity and seeks to strengthen universal peace in larger freedom. The agenda consists of 17 Sustainable development goals. The challenge here is to come up with a unified universal approach, which can help us achieve these goals. Is it possible to 'end poverty in all its forms everywhere' (goal 1); 'ensure healthy lives and promote well-being for all at all ages' (goal 3) and 'reduce inequality within and among countries' (goal 10)? Outcomes determined through the ABIF may align with these overarching goals. How does the local connect with the global?
